

Problema 1

```
import java.util.Scanner;
public class Do_While_Mustea {
    public static void main( String []args) {
        Scanner imag:dd=new Scanner(System.in);
        int n=imag:dd.nextInt();
        int i=2;
        do { System.out.print(i+" ");
            i+=2;
        } while (i<=2*n);
        imag:dd.close();
    }
}
```

Problema 2

```
import java.util.Scanner;
public class Do_While_Mustea {
    public static void main( String []args) {
        Scanner imag:dd =new Scanner(System.in);
        int n= imag:dd.nextInt();
        double i=1;
        int sum=0;
        do {
            int p= (int) Math.pow(i, 2);
            sum=sum+p; i++;
        } while (i<=n);
        System.out.println("Suma:"+sum);
        imag:dd.close();
    }
}
```

Problema 3

```
public class Do_While_Mustea {
    public static void main( String []args) {
        int j=1;
        do {
            int i=1;
            do {
                System.out.printf("%5d", i);
                i++;
            }while (i<=j);
            System.out.println(); j++; }
        while (j<=5);
    }
}
```
